## PROFESSIONAL EXPERIENCE

### URBANWATCH

2025 - Present

Front End Lead / Software Engineer

- Leading frontend architecture for a real-time AI-powered monitoring system using TypeScript.
- Directing cross-platform integration and environment consistency through Docker containerization.
- Coordinating with AI/backend teams to integrate YOLOv8 detection results into responsive dashboards.

### MINES AND GEOSCIENCES BUREAU (MGB)

May 2025 - Nov 2025

Software Developer Intern

- Built a role-based Document and Information Management System using PHP and JavaScript for secure file storage.
- Developed an automated Attendance/DTR system with QR code scanning and camera-based identity verification.
- Created an Automated Certification Issuance and Verification System utilizing unique identifiers to deter fraud.
- Managed ICT Corrective Maintenance (ICM) and server monitoring to ensure reliability and minimize disruptions.

### CHIX MO UNLI

Sep 2024 - Dec 2024

Full Stack Developer

- Engineered a comprehensive restaurant management system using Dart and Flutter.
- Architected a secure role-based access control system and financial modules integrated with Firebase.

## TECHNICAL PROJECTS

### CODESTACLE

Dec 2024 - Apr 2025

Developer & Asset Creator

- Developed an educational 2D platformer in Godot Engine for interactive programming logic.

### IOT-SMARTGLOW-LAMP

Sep 2024 - Dec 2024

Web Integration Developer

- Created a React interface for ESP32 control via HTTP and JSON for real-time hardware response.

### NOTABENE

2023

Software Developer

- Developing a C#-based system focused on streamlined data management and utility.
